**Data Curation Steps**

**Step (1) Construct User Persona**

Laura, a female Pacific Islander, is a 32-year old AI startup founder seeking to leverage her understanding of cultural nuances and linguistic variations to create user-friendly apps that resonate with people worldwide.

**Step (2) Set Up A Time Frame and Generate General Personal History**

Earlier in Time

More Recent in Time

**Step (3) Generate Topic-Specific Personal Histories**

Time, Event 🧘 Preference

Time, Event 🐰 Preference

Time, Event 🧘 New Preference and Reasons

Time, Event 🐑 Preference

Time, Event ✈️ Preference

Time, Event 🥥 Preference

Time, Event 🥥 New Preference and Reasons

Time, Event 🥥 New Preference and Reasons

.....

.....

.....

.....

**Step (4) Expand Topic-Specific Personal Histories into Conversation Sessions**

Travel Planning
Therapy Consultation
Food Recommendation Conversation Session & QAs

Travel Planning
Therapy Consultation
Food Recommendation Conversation Session & QAs

Travel Planning
Therapy Consultation
Food Recommendation Conversation Session & QAs

Travel Planning
Therapy Consultation
Food Recommendation Conversation Session & QAs

**Step (5) Constructing Long Contexts via Session Concatenation**

Perform topological sorting while ensuring causality among session under the same topic

Therapy Consultation Session → Food Recommendation Session → Travel Planning Session → Food Recommendation Session → ..... → Travel Planning Session → Food Recommendation Session
