Trajectory Memory

<action> click('188') </action>

<think> I have successfully navigated to the 'My Account' page. The user wants to know the date of their first purchase. On this page, I see a "Recent Orders" section. To ensure I find the *first* purchase, I need to view the complete order history, not just the recent ones. There is a "View All" link next to "Recent Orders" which should take me to the full order history. </think>
<action> click('1530') </action>

<think> I am on the "My Orders" page. The user wants to know the date of their first purchase. The orders are currently displayed from most recent to oldest. …</think>
<action> click('1614') </action>

Workflow Memory

Workflow: Retrieve Information from Specific Page Section
<think> This workflow is designed to access a specific section … </think>
<action> click('section_or_tab_id') </action> <action> send_msg_to_user('extracted_info_message') </action>
